

Dear Dr. Henney,

I am writing to express my concern over the  
FDA's regulation of genetically engineered  
(GE) food. I request that the agency's  
current policies be changed, and I support  
all the points in docket #00P-1211\CP1-000

- ☒ All GE foods should be labeled so I am  
informed and have a choice.
- ☒ GE foods should not be assumed to be  
"generally recognized as safe" and should  
have mandatory pre-market safety testing
- ☒ There should be a moratorium on GE  
foods until long-term studies show they are  
safe for human health and the environment.

(Additional Personal Comments:) *Let us not allow this technology to  
outpace good science. Let the biotech labs, in independently verified  
studies, prove that their technology does not adversely impact people or the  
environment. Then label it and let*
